## Plans for the Seventh War Loan

#### Goals

The Seventh War Loan campaign will open on May 14, 1945, and will continue through June 30. The goal for this drive will be \$14 billions, of which \$7 billions is assigned to individuals, including \$4 billions assigned specifically to Series E savings bonds. The goals for individuals and for Series E bonds are the highest established in any of the war loan drives. In the Sixth War Loan the goal for individuals was \$5 billions and for Series E bonds \$2.5 billions, out of a total goal of \$14 billions.

## Major Emphasis on Individuals

In announcing the drive, Secretary Morgenthau stated that, as in the Sixth War Loan, the major emphasis throughout the loan will be placed on the quota for individuals. Although the drive does not officially begin until May 14, an intensification of activities in the sale of Series E bonds will begin April 9, when millions of persons on payroll savings plans throughout the country will be asked to enlarge their participation as a part of the Seventh War Loan. All Series E, F, and & savings bonds and Series & savings notes processed through the Federal Reserve Banks and the Treasur Department between April 9 and July 7 will be credited to the drive.

During the first part of the drive, subscriptions will be received from individuals only. Subscriptions from all other nonbank investors will be received during the final phase of the drive from June 18 through June 30.

#### Securities Offered

Eight securities will be offered in the Berenth War Loan, four nonmarketable and four marketable issues. The four nonmarketable securities are unchanged from offerings in the Bixth War Loan, and consist of Zeries Z, F, and G savings bonds and Zeries C savings notes. The four marketable issues consist of 7/8% certificates, 1-1/2% bonds, 2-1/4% bonds, and 2-1/2% bonds. The specific maturity dates were announced on April 3, 1945 and are summarized in a table at the end of this article.

Subscriptions to the 1-1/2% bonds will be accepted only from individuals. Commercial banks will not be permitted to own the 2-1/2% or the 2-1/4% marketable bonds offered in the drive until within ten years of their respective maturity dates.

#### Speculative Purchased Discouraged

Special efforts are being made to achieve maximum investment of nonbank funde in the Seventh War Loan, and to hold the indirect participation of commercial banks in the drive to a minimum. These were described in a letter, dated March 20, 1945, which was sent by the Secretary of the Treasury to all commercial banks, and which is reprinted below.

"March 20, 1945

"The Treasury will open the Seventh War Loan Drive on May 14, 1945, with a goal of

\$14 billion. One of the primary objectives of this Drive will be the sale of \$7 billion of dovernment securities to individuals. This is the largest quota that has ever been set for individuals in a War Loan Drive. As a part of the campaign to raise this amount, an intensive program for the sale of Beries E bonds in the plants and factories of the country will begin on April 9.

"The Seventh War Losn will be a continuation of the Treasury's intensified war bond sales program. It is clear that Federal expenditures are going to remain at a high level for some time to come. It is also apparent that funds in the hands of non-bank investors will continue to increase sharply under present conditions. It is highly desirable to channel as much of these Aunds as possible into Government security investment, and to put them to work in the prosecution of the war.

"To the extent that this objective can be accomplished, the amount of money obtained from the commercial banking system can be reduced. The basket of securities selected for the Seventh War Loan Drive is designed to accomplish maximum investment of non-banking funds, and to hold indirect participation of commercial bank funds to a minimum. With this in mind, the following changes in the pattern and procedure followed in previous drives have been made:

- (a) The corporation quota has been reduced from the \$9 billion that was assigned in the Sixth Loan to \$7 billion. This will reduce State and county quotas in proportion and will cut down excessive subscriptions previously entered for speculative or quota-making purposes.
- (b) The basket of assurities offered to corporations does not contain the 1-1/2 percent bend that will be available to individuals during the Drive. It was in the corporate basket and on impute of this type that speculation alboriptions were entered in provious war leans, and substantial purchases of these issues were made with the proceeds of the sale of securities already sened.
- (c) Non-bank investors have been requested to refrain from selling securities now owned solely for the purpose of chtaining funds with which to subscribe for the securities offered in the Seventh War Loan Drive. This request is not intended to preclude normal portfolio adjustments

"I earnestly request your cooperation in the coming Drive, (1) in declining to make loans for the speculative purchase of Government securities; (2) in declining to accept subscriptions from your customers which appear to be entered for speculative purposes; and (3) in declining to make loans for the purpose of acquiring the Drive securities later for your own account. If you have any doubt as to the propriety of accepting a subscription for a marketable issue presented through your bank, please submit the circumstances and all available information to the Federal Reserve Bank of your District. That bank, in its capacity as fiscal agent of the United States, will advise you as to the disposition to be made of the subscription.

"I further request your cooperation in declining to purchase outstanding securities from non-bank investors on the understanding or condition that a subscription for a substantially like amount of Treasury securities offered during the Drive will be made through your bank with payment to be made through the War Loan Account.

"The Treasury is in favor, of course, of loans to facilitate permanent investment in Government securities provided such loans conform to the provisions of the Joint Statement issued by the National and State Bank Supervisory Authorities on November 23, 1942. This statement, you will recall, reads in part as follows:

'...subscribers relying upon anticipated income may wish to augment their subscriptions by temporary borrowing from banks. Such loans will not be subject to criticism but should be on a short-term or amortization basis fully repayable within periods not exceeding six months.'

"We in the Treasury realize the difficulties that the Federal Reserve Banks and
banking institutions generally have experienced in their efforts to handle subscriptions in accordance with our objectives during past drives. We also realize that it
is impossible to apply absolutely uniform
standards to the hundreds of thousands of
subscriptions for the marketable securities
which are received in the course of a big war
loan drive. What is desired and expected is
a cooperative effort to make the program as
effective and equitable as possible.

"Another matter with respect to which I should appreciate your continued cooperation is that of holding transfers of funds for the purchase of Government securities to a minimum. Statistical credits will, of course, be given to localities desired by the purchaser in the Seventh Loan as in previous drives.

"I wish to take this opportunity to

thank you for the real service that you and the other banks of the country have rendered in connection with the War Loans, the issue of Savings Bonds, and our financing operations generally. I bespeak your continued help in the coming Drive, to the end that we may obtain maximum investment in the securities offered of the type of funds we are most anxious to secure.

Sincerely.

/8/ HENRY MORGENTHAU, JR.

Secretary of the Treasury."

## Deferred Payments

Life insurance companies, savings institutions, and States, municipalities, political subdivisions, and similar public corporations, and agencies thereof, will be permitted to make deferred payment in whole or in part, at par and accrued interest, for the 2-1/4% and 2-1/2% marketable bonds allotted to them, up to August 31, 1945.

## Geographical Allocations

In order to avoid unnecessary transfers of funds from one locality to another during the Seventh War Loan, the Treasury has again requested that all subscriptions by corporations and firms be entered and paid for through the banking institutions where the funds are located. This request is made to prevent disturbance to the money market and the banking situation. The Treasury will undertake to see that statistical credit for corporation subscriptions is given to any localities which the purchaser may request, except that subscriptions from insurance companies will be credited to the State of the home office as in the past.

## Concurrent Investment of Time Deposits by Commercial Banks

During the period from June 18 through June 30 commercial banks, which are defined for this purpose as banks accepting demand deposits. will be afforded an opportunity to subscribe for certain securities included in the Seventh War Loan for the limited investment of time deposits. The securities available for such subscriptions are Series F and Series G eavings bonds, the 1-1/2% marketable bonds and the 7/8% certificates offered in the drive. Subscriptions are limited to aggregate amounts not exceeding 10% of savings deposits, and time certificates of deposit of individuals and nonprofit organizations, but not more than \$500,000 in all (of which not more than \$100,000 may be Series F and Series G savings bonds). Securities so acquired by the banks will not be included in the drive nor will they be counted toward any quota.

## Securities to be Offered in Seventh War Loan

Marketable securities 1/	Non-marketable securities

## Invasion Currency 1/

The wide geographical scope of military operations in this war and the great development of techniquee of economic warfare have made money an important offensive and defensive weapon of war. Providing this weapon in its most efficient form has required careful and detailed planning far in advance of military operations. Just as we need many varieties of military weapons, of shipe, and of planes, so we have found that the effective conduct of war on the financial side requires a variety of currency measures designed to meet varied and changeable eituations. This article explains some of the principal currency measures which have been carried out during this war.

## Keeping Dollars from the Axis

Even before we entered the war, this Government, through the Foreign Funds Control of the Treasury Department, took steps to prevent the Axis from using American currency which it looted when it overran the countries of Western Europe and other territories. If we had taken no protective measures, the Germans would have been enabled to use freely the dollare they looted in Holland, Belgium, and France, and elsewhere to buy critical war materials in the United States or in other markets, to finance propaganda and espionage, and for a host of other activities constituting an important part of the Axis total war. The strength of the dollar and its universal acceptability throughout the world made it of particular importance that we take eteps to prevent use of this currency by the Axis. What we did, in substance, was to say that no one would be parmitted to import dollars into the United States unless he could prove that the dollars were not looted by the Axis. We could not stop trading in dollars in foreign countries entirely, but we did serve notice on anyone who bought the dollar bill anywhere in the world that before he or anyone to whom he might pass the dollar note could bring it into the United States and use it for purchases here, he would have to prove that the dollar did not pass through Axis hands. These measures went a long way in accomplishing their purpose. The Axis realized far less from the dollars they stole than otherwise.

When the Japanese descended upon the Philippines, we were able to take even more effective measures. While the Japanese were still marching toward Manila, we invited people to deposit all dollar and Philippine peso currency they had with the American authorities, against receipt. Careful records were made of the currency so received, and the records are in Washington today. When the defense of the Philippines became hopeless, we burned the currency to make sure that the Japanese would not get it.

After the attack on Pearl Harbor, Hawaii became a danger spot in our defensee, and we could not be blind to the possibility that the Japanese might attempt to invade the Islands, as, indeed,

they evidently intended to do when we stopped them at Midway. As a defensive measure, we introduced the Hawaiian dollar, which is simply regular United States currency with the word "Hawaii" overprinted in large letters. We exchanged all regular dollar currency in Hawaii for Hawaiian dollars, and we were then ready for the Japanese from the point of view of money. Had the Japanese conquered Hawaii, the distinctive Hawaiian currency would have made it possible to take appropriate measures to prevent the enemy from using this ourrency to any advantage. In 1943 and early 1944, the Hawaiian dollar was put to further use in the occupation of certain Japaneseheld islands in the Pacific, for the convenience of our naval personnel, since they operated out of Pearl Harbor. More recently, since our successes in the Pacific have removed all danger of an invasion of Hawaii, we have discontinued issuing Hawaiian dollars and are gradually withdrawing these dollars from circulation by replacing them with regular currency as they are turned in to banke.

## U. S. Military Disbursements

#### In the United Kingdom

Large American forces have been in Great Britain at all times since the early days of our participation in the war. These men had to be paid, and the Army and Navy had to make incidental expenditures for their maintenance and for other military purposes not covered by reverse lend-lease. The British Government did not want American dollars paid to our troops, and thus put into circulation on a large scale in Britian. British exchange control laws forbid the circulation of foreign currencies, and the use of American dollars for troop pay and other purposes would have broken down the British domestic and foreign exchange controls. Moreover, dollar payments would have been inconvenient for the men as well, since everything they might want to epend the money for was priced in terms of British currency. For these reasons, it was obviously undesirable to pay our men in dollars. In the United Kingdom we followed the usual practice. and the one that we followed in the last war; we bought British pounds from Britain and paid for them in American dollars. Then the British money was disbursed as net troop pay in Britain and for other purposes. No special problems arose because Britain was not an invaded country, the government was functioning normally, and banking facilities were readily available for this kind of exchange transaction.

It must be pointed out that in Great Britain as well as in all other parts of the world, whatever the ourrency arrangement may be, the soldier gets local currency only to the extent that he wants cash for local expenditures. Much the greater part of the soldier's pay is not drawn in cash at all. It is allotted to dependents of the soldier, it goes to pay premiums on insurance policies, it is sent to people in the United States in the form of personal remittances, it is

<sup>1/</sup> A prese release of the Treasury Department, March 14, 1945.

deposited through Army facilities in American banks, and it is used to purchase war bonds. All of these transactions are carried out wholly in dollars. It is only a minor percentage of pay which the soldisr wants in cash for expenditures in the foreign country which is paid to him in foreign ourrency. If at any time a soldier finds that he has not spent all the foreign currency he drew, he can exchange what he has left, through Army facilities, for dollars to be sent to the United States as a remittance or for saving.

The same pattern has been followed in other lands, not occupied by the enemy, where our troops have gone in the course of the war. Thus, in Australia, Brazil, Canada, India, Iran, Iceland, and other far-flung places where our troops have gone to man the supply lines, we buy the local currency we need for dollars in the traditional manner.

## Invasion Currency

When we prepared to invade enemy countries, and countries occupied by the enemy, we could not plan to use the procedure followed in Britain and other countries which have not been battlefields of the war. From the outside, we could not know with certainty what we would encounter in enemyheld territory. In Tunisia, the Germans flooded the territory with French france, paid out with a lavish hand, in the hope of setting loose an uncontrollable inflation, as they did so much more thoroughly in Greece. In Sicily, the Germans ordered the banks to burn Italian currency before our forces arrived. We had to be ready to meet both these tactice, as well as others which have been used against us. We needed to assure our troops of necessary currency, without depending on local banks (because we might find banks destroyed, or unusable because their management's loyalty was questionable), without knowing whether civilian government would be in condition to permit normal business transactions, and without the opportunity (in the case of enemy and French territory) of making arrangements in advance with a recognized government. We had to anticipate the possibility that we would be required to provide currency for civilian needs, before local selfgovernment could be re-established in liberated areas. Our assault forces would precede even a recognized government. We might find that the mayor of the first town liberated needed money urgently to keep his police force on the job, to hire laborers to clear the streets, or for a host of other work needed in the immediate wake of battle. Our supply officers needed an acceptable currency so they might purchase quickly and readily supplies and services which the Army might require of local civilians. It is obviously sasier to hire a crew of laborers to unload ships if we pay them in cash at the end of each day, rather than give them receipts and tell them to submit their claims for future collection.

North Africa. In our first invasion operation, North Africa, we used yellow seal dollars. Yellow seal dollars, like Hawaiian dollars, are regular American currency, with a distinguishing

mark to permit segregation if the situation so requires. We simply substituted yellow ink for blue in printing the seal on regular silver certificates of the United States. We did not know whether we would be welcomed as allies or resisted as invaders; we could not be certain that we would not incur reverses. The yellow seal gave us the opportunity to segregate the currency if we should be driven from North Africa. The yellow seal also gave us the opportunity to distinguish this currency from regular United States currency which we found in circulation in North Africa on our arrival there. In administering our controls designed to keep the Axis from realizing on looted dollars, we were able to permit the yellow seal ourrency to be imported into the United States with less necessity of control than regular ourrency, which might have been looted by our enemies.

We stopped issuing yellow seal dollars in North Africa within a few months after our arrival there, and have succeeded in withdrawing almost all from circulation. When we planned to change over to the use of regular North African banknotes, we found that the French in North Africa had neither the paper, ink, nor printing facilities to supply the demand for local currency. Thus the French currency finally put to use in place of the yellow seal dollar was actually printed by a private firm in the United States, for the North African issuing banks. If General Eisenhower's invading forces had not carried a supply of currency, there would have been an actual physical shortage of money for the circulation required in North Africa. The new North African currency made possible a prompt currency conversion by the French authorities after the Nazis were expelled from Tunisia, thus stemming the inflation the Germans tried to create.

Italy and Sicily. In planning for the invasion of Italy, we had another important consideration in mind. We did not want to pay our men in dollar ourrency, and thus turn dollar claims against the United States into general circulation in an enemy country. After the last war, our Army of Occupation made gross disbursements of almost \$300 millions in Germany, most of it by cashing dollar checks for marke at German banks, and by paying out actual dollars to our troops. These dollars were never recovered. We filed a claim for our net costs of occupation, and we have been no more successful in collecting than have the European reparation claimants against Germany. By using an invasion currency assimilated to the currency of the occupied territory, we can keep the dollars pending final settlement rather than give them to the enemy.

In the first few weeks of the Sicilian operation, we used yellow seal dollars, as in North Africa. While preparations were under way for months in advance to use the Allied Military lira, we did not want to print the word "Italy" or the word "lire" until the world knew where the Allied armies would striks. We discontinued issuing yellow seal dollars in Sicily within a short time, and, as in North Africa, have since

succeeded in withdrawing the bulk of this currency from circulation.

The AM lira, which has been used ever since in Italy, is not a currency of the United States in any sense. It is an Italian currency, originally declared legal tender in Italy by the occupying Allied armies acting as the military government of occupied Italy. Under settled international law, the military governor of occupied enemy territory can make laws for the territory, with the full governmental authority. Thus, the Supreme Court of the United States has said:

"The right of one belligerent to occupy and govern the territory of the enemy while in its military possession, is one of the incidents of war, and flows directly from the right to conquer. We, therefore, do not look to the Constitution or political institutions of the conqueror, for authority to establish a government for the territory of the enemy in his possession, during its military occupation, nor for the rules by which the powers of such government are regulated and limited. Such authority and such rules are derived directly from the laws of war, as established by the usage of the world, and confirmed by the writings of publicists and decisions of courts -- in fine from the law of nations. \*\*\* The municipal laws of a conquered territory, or the laws which regulate private rights, continue in force during military occupation, except so far as they are euepended or changed by the acte of the conqueror. \*\*\* He, nevertheless, has all the powers of a de facto government, and can at his pleasure either change the existing laws or make new ones. Dooley v. United States, 182 U.S. 222 (1901).

The military governor declared AM lira to be legal tender in Italy, and thereby made the currency equivalent to and assimilated with the previously issued regular Italian lira. AM lira contains no promise of redemption on the part of the Allied forces, and the currency has in every way been made part of the currency issue of Italy. The Italian Government made the AM lira legal tender as one of its first official acts after its arrival in liberated territory in September 1943.

The Allied Military lira, while printed in the United States, was not issued by the United States. It was issued by the Allied Military Commander of the Mediterranean Theater, acting for the armies under his command, British and American, with contingents of other countries. The printing could just as well have been done in Brazil or India; we did it here because we had the printing facilities.

France, Belgium, Netherlands, and Luxembourg. Our preparations for D-Day, for the invasion of Western Europe, were simpler in two respects. First, we had legally recognized governments-in-exile with which we could deal, in the case of Belgium, the Netherlands and Luxembourg. Second, plans for an invasion of Western

Europe were publicly announced, and the currencies for all of the occupied Western European countries were produced simultaneously.

The allied forces landed on the Normandy beaches with "aupplemental france". This currency was printed in the United States, because printing facilities were available here, in agreement with the British Government and after consultation with the French Committee of National Liberation. Subsequently, the French Committee, which was successively recognized as the defacto authority in France and as the Provisional Government of the French Republic, assumed responsibility for the issue of all the supplemental france used since D-Day. Our arrangements with the French authorities thus are the same as the arrangements with Belgium, the Netherlands and Luxembourg, made before D-Day.

The Belgian Government in London had prepared a new issue of Belgian currency which was printed at its order in England. The Belgians were asked to advance to General Eisenhower as much of this new Belgian money as might be needed by the liberating armies. We undertook to pay the Belgian Government in dollars for any expenditures made by the American forces for net troop pay or for certain other strictly military purposes not covered by reverse lend-lease. Any advances made toward the conduct of normal civilian affairs in Belgium would be for the account of the Belgian Government, and we would not be expected to reimburse the Belgians.

Netherlands currency was printed privately in Canada at the order of the Netherlands Government-in-Exile, and similarly was supplied to General Eisenhower. The new Luxembourg currency was printed both in Britain and in the United States.

The availability of a new currency for each of these liberated countries provided a necessary monetary instrument, necessary both for the military forces of liberation and for the government of the liberated country. Thue, the Belgian Government, after its re-establishment in Brussels, called in all old high denomination Belgian currency circulating, and made the new notes the only legal tender. This was done as part of a financial program designed to reduce the infleted currency circulation imposed on the Belgians by the Germans and to help stabilize the Belgian economy.

Pacific Theatre. In the Pacific theatre, we followed the same procedure in our arrangements with the Dutch Government for military operations in the Netherlands Indies. The forces of General MacArthur and Admiral Nimitz were armed with Netherlands Indies guilders prepared upon the order of and issued by the Netherlands Government supplied to General MacArthur and Admiral Nimitz and paid for in dollars to the extent that they were used for net troop pay and other strictly military expenditures not covered by reverse lend-lease.

United States Army and Navy forces in the Philippines are using a new "Victory Series" of Philippine currency and a new 1944 series of Philippine coins prepared in anticipation of our return. The currency, as in pre-war days, was produced by the United States Bureau of Engraving and Printing, and the coins were manufactured by the United States Mint, at the request of the Philippine Commonwealth Government. As in pre-war days, every two pesos of the new Philippine Treasury certificates is backed by one United States dollar on deposit in the United States, and in addition the Commonwealth maintains an exchange stabilization fund amounting to between 15 and 25% of the currency in circulation.

In each of the Allied countries, the invasion currency used was not in any sense a ourrency of the United States. It was provided by the local government of the liberated country itself, and such government or its central bank is solely responsible for the redemption of the currency. We pay in U.S. dollars for the foreign currency we use for net troop pay and certain other strictly military expenditures not covered by reverse lend-lease. The moment any such diabursements are made by Army Finance officers. Washington is notified and the dollar amount is taken from the Army appropriation and set up in a special account in the Treasury. A similar procedure is followed with Navy expenditures. Thus, Congressional control over the size of Army and Navy appropriations is strictly maintained, Generals Eisenhower and MacArthur and Admiral Nimitz are supplied with ample local currency of the country in which they are operating and the Allied government is paid later when the accounts are balanced up.

As the picture changed in Italy, and Italy became a co-belligerent in our war against Germany, the AM lira demonstrated its usefulness. It was decided to make available to the Italian Government, for vital rehabilitation, the dollar equivalent of net American troop pay disburasments made in AM lira, thus following, in part, the pattern of our arrangements with our Allies. This action, taken in such a way as not to prejudice any ultimate financial settlement with Italy, is helping Italy today to share in the struggle to liberate Northern Italy.

Garmany. The Allied Military mark has now been introduced in occupied areas of Germany by the Allied armies. It is being issued under the same conditions as provided the basis for the original issuance of AM lira.

## Who Will Redeem These Currencies?

When invasion currencies were first put to use by the Allied forces the question was frequently raised, "Who will redeem these currencies?" Writers in various popular pariodicals, as well as financial journals, speculated from time to time as to whether the United States did or did not intend to redeem invasion currencies, or whether some other government or agency did or did not intend to do so.

All of this apeculation about whether or not the United States will "redeem" such currencies arises from a fundamental misconception of their nature. The United States Government did not issue any of this invasion currency (except, of course, yellow seal and Hawaiian dollars, which, as pointed out above, are in every respect United States money), and therefore is under no obligation to "radeem" auch currencies. No promise of redemption was ever made. No invasion currency carries any legend suggesting redemption by the United States. In fact the words "United States" do not appear on any of the invasion currencies at all. These ourrencies serve the same purpose of providing local means of payment as is served by the British sterling used to pay our troops in Britain and our obligation of redemption no more exists in the former case than in the latter.

Every local currency used by the Allied forces is issued by the authority of the lawful government of the country in which the currency is disbursed. Belgian, French and Dutch currencles used by our troops are lasued by the lawful Belgian, French, and Dutch Governments, just as the British pounds we use are issued by the British Government. AM lire and AM marks are issued by the lawful governments of the portions of Italy and Germany occupied by the Allied forces; under international law the military commander of these areas is the lawful government. Due to the destruction of Italian facilities, it has been necessary for the Allied Financial Agency to continue to make available AM lire, which has been made legal tender by the Italian Government in territory controlled by it, both for the needs of the Italian Government and the Allied forces.

Thus, it is perfectly clear that the United States has not obligated itself in any way to "redeem" any invasion currency issued in a foreign land, and we have no "secret understandings" that we will ever do so.

We have arranged to pay the Allied governments dollars equivalent to the net amount of invasion currency disbursed to our troops as pay and allowances in these foreign lands, as we pay dollars to the British when we buy sterling with which to meet our Army and Navy payrolls in the United Kingdom. Similarly, other strictly military expenditures originally effected in invasion currency in these Allied countries are also compensated in dollars to the Allied country whose currency we use, if they do not come within the scope of reversa lend-lease.

The local currency which is paid to our troops in foreign territories is furnished to the military forces by the governmental authority concerned. When the U.S. forces obtain a foreign currency for military expenditures, the relevant military appropriation is charged for the dollar equivalent thereof in the United States. In this manner the control of Congress over the expenditures of the U.S. military forces is maintained. The amounts of the dollar equivalent of the net troop pay and other strictly military expenditures not covered by reverse lend-lease

which have been certified to the Treasury by the War and Navy Departments are paid to the Allied government concerned. In the case of Italy, we held the money in a suspense account until recently, when it was decided, in view of Italy's status as a co-belligerent, to make the net troop pay dollars available to the Italian Government for the purchase of necessary rehabilitation supplies in the United States, as pointed out above.

When our troops are paid in new Belgian france supplied by the Belgian Government, they are getting the lawful currency of Belgium. Similarly, when they are paid in AM lire, they are getting a currency which is a lawful currency of Italy.

It is the same in each of the countries into which our armies have moved. Invasion currency is not something separate and apart from the ourrency of the country. It becomes, immediately upon issue, part of the currency of the country in which it is issued. We use the currency system we find for the needs of our troops, because

that is the quickest and most efficient way of providing our armies with the money they need for carrying on their operations.

Our allies have followed similar procedures in providing currency for their military forces in foreign lands. The British used a British Military Authority note, denominated in pounds in their early operations in Africa; again, side by side with our yellow seal dollar, in North Africa and in the early weeks of the Sicilian operations; and, only a few months ago, in the operations in Greece. The British joined us in the use of AM lire in Italy. British arrangements with the Western European countries for currency are much the same as ours. Canada is being supplied with france and guilders in the same way. The Russian forces introduced a military lei in their invasion of Rumania, and are today using the same AM mark in eastern Germany as we are using on the Western Front. We have planned with our Allies for the use of money as well as for the use of other weapons of war.

## Treasury Market Financing 1/

## Results of March Refunding

Holdere of 93% of the \$4,451 millions of Treasury notes which matured during March 1945 accepted the exchange offered them on February 19 and tendered their maturing securities in payment for new 1-year, 7/8% certificates of indebtedness dated March 1, 1945 and due March 1, 1946. More than 95% of each of the taxable issues was exchanged. The smaller proportion -- 69% -- of the wholly tax-exempt issue exchanged presumably reflects the desire of holders to do their own refunding rather than to accept a taxable security in return for a tax-exempt security. The following table shows the amount and percent of each maturing issue exchanged, and the amount of each issue remaining to be paid off in cash.

Maturing issue	ex- changed	changed	Percent ex- changed
		ions of llars)	
.90% Treas. note due 3/1/45 (taxable)	2,109	18	99
3/4% Treas. note due 3/15/45 (wholly tax-exempt)	493	225	69
1-1/4% Treas. note due 3/15/45 (taxable)	1,546	60	96
Total	4,147	304	93

## Exchange of April 1 Certificates

On March 22 the Treasury announced an exchange offering to holders of the 7/8% certificates of indebtedness due April 1, 1945. Holders of this issue were given the opportunity to convert the maturing certificates, outstanding in the amount of \$4,877 millions, into a new 7/8% certificate issue dated April 1, 1945 and maturing April 1, 1946. Subscription books were open March 22-24, inclusive, except for subscriptions from holders of \$100,000 or less of the maturing certificates, for whom the books remained open through March 28.

## Increase in Treasury Bill Offerings

Commencing with the weekly offering of Treasury bills dated March 1, 1945, the Treasury requested tenders for, and issued new Treasury bills each week in an aggregate amount of \$100 millions in excess of the bill maturities for the week. New bills were issued in the amount of \$1,300 millions weekly against weekly maturities of \$1,300 millions. During the month of March, \$500 millions of new money was raised in this manner, and the investment markets were furnished with liquid instruments immediately convertible into each by sale to the Federal Reserve Banks at the posted rate of 3/84.

Historical tables covering Treasury market financing operations appear in the statistical section, pages 31-32. Historical tables of weekly Treasury bill offerings appear on pages 33-34.

## Individual Income Tax Returns and Taxable Fiduciary Income Tax Returns for 1942

On March 31, 1945 the Secretary of the Treasury released to the public data from the "Statistics of Income for 1942, Part I". The information was compiled from individual income tax returns and taxable fiduciary income tax returns for 1942. A summary of the data made available

in the release is given in this article.

## Comparison with 1941

The table below gives a comparison of the returns for 1942 with those for 1941. It shows the number of returns, net income, deficit, and taxes paid in 1941 and 1942.

		para in 1941 an		
1	1941	1942	Increase	Percentage increase

As shown in the table, the total number of returns filed for 1942 is almost 37 millions, an increase of almost 11 millions or 41% over the number filed for 1941. The number of returns were distributed as follows:

Type of form	Number of returns (In thousands)	Percent- age change over 1941
Individual returns: Form 1040 6/ Form 1040A (optional re-	20,513	+31
not over \$3,000)	16,106	+57
Taxable fiduciary return: Form 1041	81	-4
Total	36,701	+41

The total net income reported is almost \$79 billions, a net increase of over \$20 billions or 34% over the previous year. The total includes

Form 1040A, which does not provide for reporting net income. Nearly 64% of the total increase in

Less than 500 returns.

1/ Net income is the sum of (1) net income on Form 1040. (2) gross income on Form 1040A, and (3) the net income

taxable to the fiduciary on Form 1041. The alternative tax is reported on returns showing an excess of net long-term capital gain over net shortterm capital loss, but only if such tax is less than the combined normal tax and surtax computed on net income which includes the net gain from sales or axchanges of capital assets. For 1942, the alternative tax is the sum of a partial tax (normal tax and surtax) computed on net income reduced for this purpose by the excess of net long-term capital gain over the net short-term capital loss, and 50% of such excess.

Z. Represents tax paid on Form 1040A. This tax is paid in

lieu of normal tax and surtax. Montaxable returns with net income on which personal exemption, oredit for dependents, and earned income credit axceed net income.

5/ Returns with no net income (deficit) are those wherein total deductions equal or exceed total income. For 1942, these data are based on a sample and not on a complete tabulation as in prior years.

Throughout this article, the tabulations for Form 1040 include figures for Form 1040B, returns of nonresident

net income is accounted for in the income classes under \$3,000.

Taxable returns for 1942 number nearly 25 millions, and show a net income of about \$67 billions, an increase of 55% in number and 46% in net income over 1941.

The total tax liability for 1942 is almost \$9 billions, an increase of \$5 billions or 125% over the previous year. The tax increase results from the increased normal and surtax rates, the lowered personal exemptions, the increase in the number of returns filed, and also from the generally higher incomes received by taxpayers. The alternative tax decreased because it is no longer applicable when there is a net loss from sales of capital assets.

The average tax for the taxable returns is \$322 as compared with \$222 for 1941 and the effective tax rate is 13.3% as compared with 8.5% for 1941.

## Changes in Internal Revenue Code

It should be pointed out that the comparability of data for individual and fiduciary returns for 1942 with data for the previous year is affected by changes in the Internal Revenue Code as made by the Revenue Act of 1942. The most important changes were the following:

- (a) The minimum amount of gross income for which a return is required to be filed is reduced from \$1,500 to \$1,200 for a married person living with husband or wife for the entire taxable year; and from \$750 to \$500 for a single person, a married person not living with husband or wife for any part of the taxable year, an estate, and a trust.
- (b) The personal exemption is reduced from \$1,500 to \$1,200 for a person who, during the entire year, was head of a family, or was married and living with husband or wife; and from \$750 to \$500 for a single person, a married person not living with husband or wife any part of the taxable year, and an estate. The oredit on Form 1040 for a dependent is reduced from \$400 to \$350.
- (c) The normal tax rate is increased from 4% to 6%, and the surtax rate of 6% of the first \$2,000 of surtax net income, progressing to 77% of surtax net income in excess of \$5,000,000, is increased to 13% of the first \$2,000 of surtax net income, progressing to 82% of surtax net income in excess of \$200,000.
- (d) The optional return, Form 1040A, is no longer permitted to be used by a taxpayer receiving rent and royalty income. The deduction on Form 1040A, for a dependent is reduced from \$400 to \$385 and the marital status is determined as of July 1,

- instead of the last day of the taxable year. The optional tax is increased to reflect the changes in rates for normal tax and surtax.
- (e) Personnel below the grade of commissioned officer in the military or naval forces of the United States exclude from gross income salary received for active service in such forces to the extent of \$250 if single and not the head of a family, or \$300 if married or the head of a family. The filing of returns is automatically postponed for all members of the military or naval forces serving outside the continental United States.
- (f) Amortizable bond premium is a deduction against interest received; and medical expenses paid during the taxable year not compensated for by insurance or otherwise are allowed as a deduction from gross income to the extent that such expenses exceed 5% of net income computed without regard to the medical expense. However, the medical expense deduction is limited to \$2,500 in the case of husband and wife who file a joint return, or the head of a family, and to \$1,250 for all other individuals.
- (g) Real setate used in trade or business is removed from the definition of capital assets. The meaning of short-term is changed from 18 months or less to 6 months or less and that of long-term from more than 18 months to more than 6 months. Only 50% of the gain or loss recognized upon the sales or exchanges of capital assets held more than 6 months is taken into account in computing net income; formerly, 66-2/3% of the gain or lose from sales of capital assets held more than 18 months but not more than 24 months, and 50% of the gain or loss from such sales held more than 24 months, were taken into account. Losses from sales or exchanges of capital assets are allowed as a deduction only to the extent of the gains from such sales or exchanges, plus the net income computed without regard to such gains or losses, or \$1,000, whichever is smaller. Formerly, the shortterm capital loss was allowed only to the extent of short-term gain; and long-term capital loss was allowed to the extent of long-term capital gain and to the extent of other income which included the net short-term capital gain.
- (h) In the computation of alternative tax, the rate applicable to long-term gains from sales or exchanges of capital assets is changed from 30% of the net long-term capital gain to 50% of the excess of net long-term gain over net short-term capital loss. There is no alternative tax in the case of a net loss from sales or ex-

changes of capital assets, but the deduction for such a net loss is limited as described in (g) above.

## Coverage of the Statistics

The returns included in this report are returns for the calendar year 1942, a fiscal year ending within the period July 1942 through June 1943, and a part year with the greater part of the accounting period in 1942. Returns for which statistics are tabulated are Forms 1040, 1040A, 1040B, and 1041. Tentative returns and amended returns are excluded. Statistics are taken from the returns as filed by the taxpayer, prior to revisions that may be made as a result of audit by the Bureau of Internal Revenue.

Data for individual returns, Form 1040, with net income of \$5,000 and over, and for taxable fiduciary returns regardless of the amount of net income, are tabulated in full. This procedure is followed also with respect to individual returns, Form 1040, with net income under \$5,000 where business receipts equal or exceed \$25,000. Data for all other Form 1040 returns with net income under \$5,000, and for all Form 1040A returns, are not tabulated in full but are estimated from samples.

The optional return, Form 1040A, which may be filed by an individual whose gross income is not more than \$3,000 and is wholly from salary, wages, dividends, interest, and annuities, does not provide for reporting the amount of net income, therefore such returns are not distributed by net income classes. The gross income is tabulated both as total income and net income. The personal exemption shown in the tables is determined from the taxpayer's status as indicated on the return and the earned income credit shown is

estimated at 9.4% of the gross income.

The net income used for tabulation and classification of the fiduciary returns is the net income taxable to the fiduciary, that is, after deducting the amount distributable to beneficiaries.

Table 1, at the end of this article, shows tabulations from individual returns and taxable fiduciary returns for 1942 by States and territories. It gives the number of returns, net income, gross income, deficit, and tax distributed by States, as well as the percent of population which filed returns in the individual States and territories.

Table 2 gives a distribution by net income classes of the number of returns, net income, exemptions and credits, total tax and other data tabulated from individual and taxable fiduciary returns for 1942. The data for Form 1040 and Form 1041 with income under \$5,000 are broken down into more detailed income classes than heretofore. Starting with the lowest, under \$500, the classes proceed by intervals of \$250 up to \$3,000, and by intervals of \$500 up to \$5,000, thus practically doubling the number of classes in this range shown for 1941. Thereafter the income breaks are the same as previouely used.

Table 3 presents information on the various sources of income and deductions for returns of individuals and of taxable fiduciaries. Total income from all sources aggregated almost \$87 billions for all returns, while deductions amounted to almost \$8 billions leaving \$79 billions of net income. Details on sources of income and deductions by income classes are given in the original release.

Lees than 500 returns or less than \$50,000. Estimates of the Bureau of the Census. The net income used for classification and tabulation of taxable fiduoiary returns is the net income taxable to the fiduciary, that is, after deducting the amount distributable to beneficiaries (item 18, p. 1, Form 1041). Data for taxable fiduoiary returns include those for estates and trusts, filed improperly on Form 1040, but which have net income taxable to the fiduciary. In tabulating data from these taxable returns filed improperly on Form 1040, an adjustment is made whereby the "Amount distributable to beneficiaries" (if any) is removed from deductions and tabulated as such in

table 3.

Form 1040A (optional return), which may be filed by individuals whose gross income is from certain sources only and is not more than \$3,000, does not provide for reporting the amount of net income. Gross income is tabulated both as total income and as net income.

4/

Returns with no net income (deficit) are those wherein total deductions squal or exceed total income. For 1942, these data are based on a sample and not on a complete tabulation as in prior years.

as in prior years.

Total tax is the aggregate of normal tax, surtax, alternative tax, and the optional tax on Form 1040A, paid in lieu of normal tax and surtax.

Less than \$500.

1/ The net income used for classification and tabulation of taxable fluciary returns is the net income taxable to the fiduciary, that is, after deducting the amount distributable to beneficiaries (item 18, p. 1, Form 1041). Data for taxable fiduciary returns include those for estates and trusts, filed improperly on Form 1040, but which have net income taxable to the fiduciary. In tabulating data from these taxable returns filed improperly on Form 1040, an adjustment is made whereby the "Amount distributable to beneficiaries" (if any) is removed from deductions and tabuleted as such in table 3.

2/ For 1942, the personal exemption allowed a person who, during the entire taxable year, was the head of a family or was married and living with husband or wife is reduced from \$1,500 to \$1,200 and that of a single person, a married person not living with husband or wife, and an estate is reduced from \$750 to \$500. A trust is allowed, in lieu of personal exemption, a credit of \$100 against net income. The personal exemption tabulated for individual returns, Form 1040A, is secertained from the taxpayer's status which is indicated on the return.

the return.

For 1942, the credit for a dependent is reduced from \$400 to \$350 for individuals filing on Form 1040 and from \$400 to \$355 for individuals filing on Form 1040. There remains in effect the provision that, in the case of a taxpayer who is head of a family only by reason of one or more dependents for whom he would be entitled to credit, the credit is allowed for each of such dependents, except one.

ents, except one. Earned income credit is 10% of earned net income (not to exceed \$14,000) or 10% of net income, whichever is smaller. The credit tabulated for the optional returns, Form 1040A, is estimated at 9,4% of gross income (equivalent to 10% of the income after deductions aggregating 6% of gross income). Total tax is the aggregate of normal tax, surtax, alternative tax, and the optional tax on Form 1044A, paid

in lieu of normal tax and surtax.

Normal tax and surtax are reported on (1) returns with neither a net gain nor a net loss from sales or exchanges of capital assets, (2) returns with a net gain from such transactions, unless the alternative tax is imposed, and (3) returns with a net loss from similar transactions.

transactions. The alternative tax is reported on returns showing an excess of net long-term capital gain over net short-term capital loss, but only if such tax is less than the combined normal tax and surtax computed on net income which includes the net rain from sales or exchanges of capital assets. For 1942, the alternative tax is the sum of a partial tax (normal tax and surtax) computed on net income reduced for this purpose by the excess of net long-term capital gain over the net short-term capital loss, and 50% of such excess. Represents total tax divided by number of returns. Represents total tax divided by net income. Estimated.

Estimated.
Form 1040A (optional return), which may be filed by individuals whose gross income is from certain sources only and is not more than \$3,000, does not provide for reporting the amount of net income. Grose income is tabulated both as total income and as net income. Throughout this article, the tabulations for Form 1040 include figures for Form 1040A; returns of nonresident aliens with business within the United States. Nontaxable returns with net income on which personal exemption, credit for dependents, and earned income credit exceed net income. Returns with no net income (deficit) are those wherein Estimated.

Returns with no net income (deficit) are those wherein total deductions equal or exceed total income. For 1942, three data are based on a sample and not on a complete tabulation as in prior years.

Deficit. Not available.

Net income less deficit.

Dividends received include dividends on share accounts in Federal savings and loan associations issued on or after March 28, 1942, but excolved through partnerships and fiduciaries.

Form 10/MoA income from this source is included in "Other income".

Interest received from bonds is the net amount after deducting the amortizable bond premium for the taxable year. This deduction was not made against interest in former years.

Partially tax\_exempt interest is that received on certain Government ability tax\_exempt interest is that received on certain Government.

obligations issued prior to March 1, 1941, namely, United States eav-inge bonds and Treasury bonds owned in excess of \$5,000, and obligations of instrumentalities of the United States other than those is-eued under the Federal Farm Loan Act or that Act as amended. This enterest is subject to surtax only. The amount reported includes such interest received through partnerships and fiduciaries. Taxable interest on Government obligations is that received on Treas-

the united states of deverament collections is that received on treasury notes issued on or efter December 1, 1940, and on obligations of the United States or any agency or instrumentality thereof, issued on or after March 1, 1941. This interest is subject to both normal tax and surtax. The amount reported excludes such interest received

through partnerships and fiduciaries.

through partnerships and liduciaries. Dividends on share accounts in Federal savings and loan associations are only those on shares issued prior to March 28, 1942, and include such dividends received through partnerships and fiduciaries. These dividends are subject to surtax only. Dividends on shares issued on and after that date are reported with dividends received from corponate at the subject to surtax only. rate stock.

The amount reported as net gain or loss from sales or exchanges of capital assets is the amount taken into account in computing net income and is a combination of short-term and long-term capital gains and losses, worthless stocks and bonds which are capital assets, and each participant's share of capital gains and losece to be taken into

each participantie chare of capital gains and losees to be taken into account from pertnerships and commen trust funds; also the net chort-term capital loss of the preceding taxable year (not in excess of nst incoms for such year) has been deducted but only to the extent of net chort-term capital gain of the current year. Real property used in the trade or business of the taxpeyer is not a capital asset for 1942. Wet gain or loss from the sales of property other than capital essets; (1) property used in trade or business of a character which is cubject to the allowance for depreciation, (2) obligations of the United States or any of its possessions, a State ar Territory or any political cubdivision thereof, or the District of Columbia, issued an or after March 1, 1941, an a discount basis and payable without interest at a fixed maturity date not exceeding one year from date of issue, and (3) real property used in trade or business or profession (sole proprietorship). (Net operating loss deduction is reported in "Other deductions").

deductions", J Partnership profit or loss, as reported on the income tax return of the partner, excludes (1) partially tax-exempt interest on Government obligations, and (2) ast gain or loss from sales or exchanges of cap-ital assets, each of which is reported in its respective source of in-come or deduction, and (3) dividends on share accounts in Federal savings and loan associations issued prior to March 28, 1942, which are reported in the schedule for interest on Government obligations are reported in the echedule for interest on Government abligations

but are tabulated separately. In computing partnership profit or lose, charitable contributions are not deductible nor is the net operating loss deduction allowed. However, the pro rata chare of contributions and prior year income and losses of the partnership is taken into account by each partner in determining hie own contribu-

taken into account by each partner in determining his own contribu-tions and net operating loss deduction, respectively.

Income from fiduciaries, as reported on the income tax return of the beneficiary, excludes (1) pertially tex-exempt interest on Government obligations, and (2) net gein or loss from sales or exchanges of cap-ital assets received from common trust funds, each of which is re-ported in its respective source of income or deduction, and (3) divi-dands on share accounts in Faderal savings and loan associations. dends on share accounts in Federal savings and loan associations issued prior to March 28, 1942, which are reported in the schedule for interest on Government abligations but are tabulated separately. for interest on tovernment colligations out are tabulated separately. The net operating loss deduction is allowed to estates and truste generally, and is deducted in computing the net income to be distributed. In the case of a common trust fund, however, this deduction is not allowed, but each participant's share of prior year income and losses of the fund is taken into account in determining his own not operating loss deduction.

12/ Other income includes alimony received, earnings of minors, prizes, sweepstakes, gambling profite, etc. The amount of dividende, interest, and annuities reported in one sum on the individual returne.

set, and annuities reported in one sum on the individual returne. Form 1040A, is tabulated as other income.

13/ Form 1040A (optional return), which may be filled by individuals whose gross income is from certain sources only and is not more than \$3,000, does not provide for reporting the amount of net income. Therefore no deductions are shown for Form 1040A. Ret income is the sum of (1) net income on Form 1040, (2) gross income on Form 1040A, and (3) the net income taxable to the fiduciary on Form 1041.

het income taxale to the fiduciary on Form 1041, A not lose from sales or exchanges of capital assets is allowed only to the extent of the not income computed without regard to capital gains and losese, or \$1,000, whichever is smaller. (This limitation does not apply to returns with fiscal years ending in the period July through November 1042,)

Contributions include each partner's share of the charitable contri-

15/ Contributions include each partner's share of the charitable contributions made by the partnership of which he is a member.

16/ Such deductions exclude amounts reported in the schedules for (1) rents and royelties, and (2) business or profession.

17/ Losses from fire, storm, shipwreak, or other casualty, or from theft, not compensated for by insurance or otherwise.

18/ Medical and dental expenses paid for care of taxpayer, his wife, or a dependent, not compensated for by insurance or otherwise, which exceed 5% of the net income computed without the deduction. This deduction is limited to \$2,500 in the case of a husband and wife who file a joint return, or a head of a family, and to \$1,250 for all other individuals. Medical expenses were not allowed as a deduction in former years. in former years.

in former years.

Other deductions include alimony peid, net operating loss deduction, expenses incurred for the management and maintenance of property held for the production of taxable income, etc. The current year net loss from rents and royalties reported in sources of income is tabulated.

The stable 3 the argument include losses from fire in other deductions. In table 3 the amounts include losses from fire, etorm, etc., and bad debts not compensated for by insurance or otherwise, reported an fiduciary returns. SUMMARY OF FISCAL STATISTICS

Source: Actual receipts and expenditures come from Daily Treasury Statements; source of estimated figures is explained in footnete 1.

Less than \$500,000.

Based upon satimates as shown in the 1946 Budget. Classifications herein are based upon date susceptible of segregation according to Daily Treasury Statements and will not necessarily agree with classifications in Budget document.

Includes unjust enrichment tax and taxes withheld by employers under both the Revenue Act of 1942 and the Current Tax Payment Act of 1943. For details see following chapter on Receipts and Expanditures and Approprietions, Table 2.

Includes chiefly alcoholic beverage taxes, tobacco taxes, manufac-turers' and retailers' excise taxes, and estate taxes. Includes deposite resulting from the ranegotiation of war contracts. includes deposite reculting from the rangotistion of war contracts Information on the amount of such deposits is not available on the basic of Daily Treasury Statements. On the basic of covering warrante, each deposits were as follows: fiscal year 1943, \$558 millions; fiscal year 1944, \$2,235 millions, of which \$113 millions represented a voluntary return of excess profits. Budget estimates of such deposits for the fiscal year 1945 are \$1,685 millions, and for the fiscal year 1946, \$952 millions.

For explanation, see tables in part center on Social security pro-

For explanation, see tables in next chapter on Social security pro-

- 6/ Excludes expenditures for public debt retirements which are chargeable to the sinking fund, etc. under special provisions of law.
- Includes expenditures classified as transfers to trust accounts etc., for the Adjusted Service Certificate Fund and the Mational Service Life Insurance Fund.
- Includes Public works transactions classified as Revolving Funds (net).
- Includes Aid to agriculture transactions classified as Revolving Funds (net); expenditures of the Department of Agriculture classified as Departmental in the Dully Treasury Stetement; and Office of Distribution transactions classified as transfers to trust accounts,
- Included expenditures classified as transfers to trust accounts, etc. for the Railroad Retirement Account and the Railroad Unemployment Insurance Administration Fund. Excludes expanditures made by Office for Emergency Management, War Manpewer Commission (U. S. Employment Service) under authority of the Social Security Act. Includes National Youth Administration.
- Represents transfers to public debt accounts for excess profits tax refund honds.
- Includes departmental expanditures not otherwise classified and expenditures classified as transfers to trust accounts, stc., for Government employee retirement and insurance funds.

Source:

Daily Treasury Statements.
Less than \$500,000.
Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc. under special provisions of law.
For further details, ess Table 2.
For explanation see tables which follow on the Social Security pro-

grem.

For further details, see Table 3.

For further details, see Table 4.

For further details, see Table 5. Also see footnotes 3 and 4.

Total expenditures less net receipts.

Represents expenditures for public debt retirements which are charge-

able to the einking fund, etc. under special provisions of law.
Includes recoveries of U. S. investments in capital funds. Such re-

ocveries totaled \$5\mu\$ millions in the fiscal year 19\mu\$0; \$319 millions in the fiscal year 19\mu\$1; \$18 millions in the fiscal year 19\mu\$1; \$18 millions in the fiscal year 19\mu\$2; and \$10 millions in the fiscal year 19\mu\$3. Receipts from reductions in capital stock and paid-in surplus available to be reissued under existing law are included as negative items under expenditures. Such reductions totaled \$160 millions for general expenditures and \$155 millions for revolving funds during the fiscal year 19\mu\$1. Includes deposite resulting from the renagotistion of war contracts. Information on the amount of such deposite is not available on the basis of Daily Trassury Statements. On the basis of covering warrants, such deposite were as follows: fiscal year 19\mu\$3, \$558 millions; fiscal year 19\mu\$4, \$2,235 millions, of which \$113 millions represented a voluntary return of excess profite.

Reviewd.

Consists of appropriations and net contract authorizations available Consiste of appropriations and net contract authorizations awailable on and after July 1, 1940. Excludes: (1) authorizations of the Reconstruction Finance Corporation and its affiliates for war purposes, and (2) unexpended belances of appropriations on June 30, 1940 (except immediately available funds from fiscal year 1941 appropriations) available for expenditure in the fiscal year 1941. Contract authorizations have been reduced by later appropriations which were sammarked in authorizing acts for this purpose. Represents the net amount of contractual authority that the Fresident way authorize the head of any desertment or reserve of the for-

nepresents the net amount of contractual authority that the President may authorize the head of any department or agency of the Government to enter into for the procurement of defense articles, information, or services for the government of any country whose defense the President deems wital to the defense of the United States. Includes \$9,695,525,500 appropriated for the fiscal year 1942. Unappropriated contract authorizations for the naval expension program are a follows:

gram are as follows:

Date approved	Public Law No.	Amount
Feb. 7, 1942	441	\$2,171,000,000

Daily Treasury Statements.
Lese than \$500,000.
This is the net budgetary deficit. Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law.
This represents the increase in the gross public debt, except as noted. (See footnote 7.)
Includes Federal Old-Age and Survivors Insurance Trust Fund, Unemployment Trust Fund, Railroad Retirement Account. Government insurance and retirement funds and other trust funds.
Comprises Public Worke Administration revolving fund and special deposits (net). Also includes Office of Distribution (formerly Agricultural Marketing Administration) commodity food stemp transactions.

Includes expenditures for retirement of national bank ootes. In the fiscal years 1935 and 1936, \$91 millions and \$554 millions

were transferred from increment on gold to the working balance for retirement of netional bank notes. In this statement, however, charges for retirement of actional bank notes are reflected directly against increment on gold, in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance general and special accounts for the pur-

of the working balance geoerel and special accounts for the purpose of this table.

Expenditures for the retirement of national bank notes from increment on gold for the fiscal years 1935 to 1939 (as shown below) are not reflected berein, but are reflected under increment on gold as follows: 1935, \$91 millions; 1936, \$397 millions; 1937, \$99 millions; 1938, \$51 millions; and 1939, \$5 millions; total. \$615 millions. The increases in the public debt shown in the table "Means of Financing Cash Requirements" for the above fiscal years will not agree for the reason stated above.

1/ Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used.

For the purposes of computing the annual interest charge and rate of

interest on United States savings bonds, Sories A-E are considered to yield 2.90% per annum and Series F is considered to yield 2.53%.

2/ Guaranteed securities held by the Treesury, and securities guaranteed as to interest only, are not included in this table.

position of Federel income taxes on income derived therefrom.

"Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Pertially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and sevings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. "Tax-eble" securities are subject to both normal and surtax rates.

ce: Daily Treasury Stetement, and reports to the Treasury.

1/ Excludes postal savings bonds, Federal Housing Administration debentures, and guaranteed securities held by the Treasury.

2/ It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which e definite notice of call has been made, however, are listed as fixed maturities.

3/ Federal securities fall into three broad groups with respect to im-

Back Figures: For period December 1941 through February 1943, see "Treasury Bulletin" for November 1944, page 32.

Preliminary.

Revised. In the case of the reopening of a previously offered security, the period to first call and to maturity are calculated from the date interest commences on the reopening.

3/ Consists of all public cash subscriptions and of subscriptions by

U. S. Government agencies and trust funds.

Reopening of previously offered escurity. Interest commenced on October 15, 1943.

// Announcement of exchange offering was included in announcement of Third War Loan, August 16, 1943.

// Figures on amount of War Loan securities issued consist both of

- amounts issued in connection with the Drive, and of amounts issued concurrently with Drive to U. S. Government agencies and trust funds and to commercial banks.

and to commercial banks.
Interest commenced on March 15, 1944.
Interest commenced on June 26, 1944.
Interest commenced on September 15, 1944.
This is the same security that was offered in the Sixth War Loan.
Exchanged as of December 15, 1944 and accrued interest charged from December 1 to December 15.

13/ Amounts not yet available.

interest commences on the reopening.

Restricted issues are those which commercial banks (defined for this purpose as banks which accept demand deposits) are not permitted to acquire prior to a specified date, with two exceptions: (1) concurrently with the Fourth, Fifth and Sirth War Loans, commercial banks were permitted to subscribe to the restricted issue offered in the War Loan for limited investment of their savings deposite; (2) commercial banks may temporarily acquire restricted issues through foreclosure when such issues have been used as colleteral.

Consists of all sublic cash subscribious and of subscribing by

Source: Daily Treasury Statements.

Less than \$50,000.

At current redemption values except Series G, which is stated at par.

Estimated, except for Series G.

For details concerning investment yields and redemption values, see "Treesury Eulletin" for August 1943, page 4.

Commercial bank purchases were permitted prior to April 1, 1940, and are estimated to have aggregated about \$300 sillions.

Not yet available.

Series A-D. sold between March 1935 and April 1941, are 10 year discount bonde sold at 75% of maturity value, yielding 2.90% per annum if held to maturity; purchases were limited to \$7,500 issue price in any calendar year and from April 1, 1940, could be made

price in any calendar year and from April 1, 1940, could be made only by individuals.

There were \$64.3 millions of Series A-D and E savings bonds redeemed through February 28, 1945 which had not been identified by series. For purposes of this table, it has been assumed that all of these were Series E bonds.

Series E, on sale since May 1, 1941, is a 10 year discount bond cold at 75% of maturity value, yielding 2.90% per annum if held

to maturity; purchases are limited to \$3,750 issue price in any

to maturity; purchases are limited to \$3,750 issue price in any calendar year and may be made only by individuals. Series F and 0 have been on sale since May 1, 1941. Series F is a 12 year discount bond sold at 74% of maturity value, yielding 2.53% per annum if held to maturity. Series 0 is a 12 year current income bond, sold at par, bearing interest at the rate of 2-1/2% per annum redsemble at par on maturity or at stated prices less than par before maturity. Purchases of Series F and 0 combined in any one calendar year are limited to \$100,000 issue price (\$50,000 in calendar year 1941). During the calendar year 1944 commercial banks were permitted to purchase Series F and 0 bonds under certain conditions. Limitations on such purchases for the period January 1, 1944 through Sovember 19, 1944, were described in the "Treasury Bulstin" for December 1944, page 36, footnote 9. The limitation on commercial bank purchases for the period Sovember 20, 1944 through December 19, 1944 was \$100,000 providing that total holdings of Series F and 0 bonds. 2% Treasury bonds of 1952-54, and 2-1/2% Treasury bonds of 1966-71 did not exceed 10% of the combined amount of time certifications on associations and of savings deposits, or \$500,000. porations or associations and of savings deposits, or \$500,000, whichever was less.

#### Table 4.- Redemptions of Series A-D and E Combined, Classified by States

Data on savings bond radamptions by States for Series A-D and E combined became available beginning in October 1944. Figures for the months from Octobar 1944 through January 1945 are shown below. It should be noted that State figures on redemptions are not necessarily comparable

with salss data by Statee inasmuch as bonds which have been purchased in one State may have been redeamed in another. Moreover, the figures on redemptions are on the basis of current redemption value, whereas the sales figures are at lesse price.

(In thousands of dollars at current redemption values)

Source: Daily Treasury Statemente.
Less than \$50,000.

2/ Includes matured Treasury savings notes.

3/ Series A notes, which were sold from August 1, 1941 through June 22, 1943, yield approximately 1,92% per annum. Through June 22, 1943, the notes could be redeemed for cash only at the original purchase price; since that date, the notes have been redeemed for cash at

the tax payment value current at the time of presentation. (See also footnote 1.) Prior to October 4, 1943, the maximum amount which could be used in payment of each class of tax (income, estate, or gift) by each taxpayer during each taxable year was limited to \$5,000 per value; this limitation was removed as of that date.

Series B notes were cold from August 1, 1941 through September 12, 1942, to yield approximately 0.48% per annum. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for each only the the original numbers price.

be turned in on taxes is unlimited. The notes may be redeemed for cash only at the original purchase price.

5/ Series C notes went on sale September 14, 1942. Interest eccrues each month on a graduated scale (see "Treasury Bulletin" ? " August 1943, page 4) to yield approximately 1.07% per annum if here to maturity. These notes may be used in payment of Federal taxes at any time two months after the date of issue. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash six months after the date of issue at the tax payment value current at the time of presentation. Prior to July 27, 1943, notice of 30 days was required for cash rademption. See also footnote 1.

These notes were originally designed to help taxpayers set eside funde with which to pay taxes and were known as Treasury tax earings notes. Series A notes were designed for the small and moderete taxpayer; Series B and Series C notes were intended for the large taxpayer. When the collection of taxes through withholding at the source commenced, the need for Series A tax savings notes disappeared and their cale was discontinued. Redemption provisions on Series A notes were relaxed to provide for the payment of interest on notes thereafter redeemed for cash (see footnote)). Sale of Series C notes, which were designed for the investment of idle cash recerves as well as for the accumulation of tax reserves, was continued and the notes were designated Treasury savings notes.

- Source: Daily Treasury Statements commencing November 1, 1942; prior thereto, Post Office Department.

  1/ Figures for periods prior to November 1, 1942 are not strictly comparable with subsequent data because of the shift to a Daily Treasury Statement basis. Stamps sold prior to October 1, 1942 were known as postal savings stamps and were obligations of the Postal Savings System but subsequently became public dabt obligations.
  - 2/ Estimated on the basis of samples conducted by the Post Office De-
  - partment.

    Sales and redemptions commence with May 1, 1941 when the special defence series of stamps went on sale. The emount of the old se-

ries of postal sevings stemps outstanding on April 30, 1941 was \$150 thousands.

\$150 thousands.

4/ Details not available for May, June, and July 1941.

5/ Includes minor amounts which were exchanged for postal savings certificates. These aggregated \$123 thousands for the period August 1, 1941 through June 30, 1942 and \$55 thousands for the period July 1, 1942 through October 31, 1942.

6/ Net of sales less redemptions. See footnote 1.

7/ Does not include amounts transferred from Postal Savings System to

the Treasury to cover outstanding stamps.

current redemption values.

Guaranteed securities held by the Treasury are excluded.

Consists of commercial banks, trust companies, and stock savings banks in the United States and in territories and insular possessions. Excludes escurities held in trust departments.

<sup>1/</sup> Includes partnerships, psrsonal trust accounts, and unincorporated

<sup>5/</sup> Includes dealers and brokers and investments of forsign balances in this country.

<sup>6/</sup> Includes their agencies and their trust, einking, and investment funds, and territories and insular possessions.

Less than 300,000.
// Consists of purchases or sales made by the Tressury. Treasury investment accounts comprise (1) trust funds which by law ere under the control of the Secretary of the Treasury or of the Treasurer of the United States, and (2) accounts under the control of certain

U. 5. Government agencies whose investments are handled through the facilities of the Treasury Department. This table size includes purchases under Section 19 of the Second Liberty Bond Act. as amended, and excludes the Exchange Stabilization Fund.

## Treasury Survey of Ownership of Securities Issued by the United States Government and by Federal Agencies, January 31, 1945

#### Section I - Securities Issued or Guaranteed by the United States Government

The tables in Section I present summary data as of January 31, 1945 from the Treasury Survey of Ownership of Securities Issued or Guaranteed by the United States. The banks and insurance companies covered in the survey account for approximately 95 percent of the amount of such securities

owned by all banks and insurance companies in the United States.

Section II presents for the first time summary data on the ownership of Federal land bank bonds.

Back Figures: The Treasury Survey commenced with data for March 31, 1941 and has been published regularly in the "Treasury Bulletin" since May 1941. Revisions of data for Septecher 30, 1944 appeared in the February 1945 issue, page 53; reclassification of data on banks for the period November 1943 through February 1944 appeared to the May 1944 issue, pages 52-57; revisions of data on insurance commanies for May 31, 1943 and prior months appeared to the November 1943 issue, pages 62-63.

Less than \$500,000 or less than .055.

1/ Securities hald in trust departments are excluded.

companies which are not covered in the Treasury Survey. See head-

Securities held in trust departments are excluded.

Includes trust companies.

This column includes securities held by those banks and insurance

companies which are not borered in the irreasily survey. So, however, note to this saction.

Puaranteel securities held by the Treasily are not included.

Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefore.

Wholly tex-exempt securities are exempt from both the normal and surtax rates. "Pertially" tax-exempt securities are exempt from the included the second partially tax-exempt. surrax rates. Farrially talestand to the form of the normal rates except that in the page of partially haveerampt freezing and savines bonds, interest derived from \$5,000 of principal amount owned by any one notion is also expent from the surtex rates. "Taxable" securities are subject to both normal end tex rates. "

- Lees than \$500,000.
- 1/ United States savings bonds, Series A-D, E, and F are shown at current redemption values. They were reported at maturity value by the banks and insurance companies covered in the Treasury Survey but have been adjusted to current redemption values for use in this statement.
- 2/ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. "Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of prin-
- cipal amount owned by any one holder is also exempt from the sur-tax rates. "Taxable" securities are subject to both normal and surtax rates.
- Securities held in trust departments are excluded. Includes trust companies.
- This column includes escurities held by those banks and insurance companies which are not covered in the Treasury Survey. See headnote to this section.
- Series A-D savings bonds sold prior to March 1, 1941 are partially tax-exempt; those sold on and after that date are taxable.
   Guaranteed securities held by the Treasury are not included.

#### Section II - Interest-Bearing Securities Issued by Federal Agencies But not Guaranteed by the United States 1/

Data on Federal lend bank bonds Nota: held by banks and ineurance companies cov-ared in the Treasury Burvey are not en-tirely comparable with figures on holdings of securities issued and guaranteed by the

United States because a total of 197 fewer institutions reported with respect to their holdings of Federal land bank bonds. Eventually the two series should be fully comparable.

<sup>1/</sup> When the price of a security is such as to result in a negative yield, the excess of price over sero yield is given in the yield

yield, the excess of price over sero yield is given in the yield columns in thirty-seconds.

2/ Prices represent the mean of closing bid and eak quotations in the over-the-counter market except that prices of Theosury and Home Owners' Loan Corporation bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "White issued" prices are included beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.

Computed on mean price to call date when mean price is above par and to maturity date when mean price is below par. Included in the average of long-term taxable Treesury bonds.

Not quoted on February 28. From February 21 through February 27.

quoted at par. Prior thereto, quoted on a yield basis. Quoted on yield basis. For amount of this security issued on March 1, 1945, see table on "Offerings of Marketable Issues of Treasury Bonds, Notes, and Cartificates" in the chapter on "Public Dabt and Owaranteed Obligations of the United States Government."

No data hecause security was not quoted on January 31. This security was issued on March 1, 1945, in the amount

<sup>\$1.314</sup> millions. 10) This is the only bond eligible to remain in the average of long-term partially tax-exempt Treasury bonds.

Excludes postal savings bonds.
Excludes Federal Housing Administration debentures.

Basis of Computation: (1) Treasury boad yields are computed on the basis of the mean of closing bid and ask quotations in the over-thecounter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when eales took place on the Exchange in a particular issue and the mean of closing bid and sex quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the lest preceding sele is used.

Back Figures: Monthly and weekly date for the period January 1933 through March 1944 appeared in the "Treasury Bulletin" for April 1944,

pages 57-61.

1/ Average of Treasury bonds neither due nor callable for fifteen years. For discussion of composition of everage see "freesury Eulletin" for March 1944, page 58. Partially tax-exempt bonds are those the interest on which is exempt from the normal rates of the Federal income tax, except that in the case of partially tax-exempt Treasury and United States savings boods, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates of the Federal income tax. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax.

reases of the Federal Income tax.
 For discussion of present composition of high-grade corporate bond average, see "Treesury Bulletin" for January 1945, page 56; for discussion of its previous composition, as well as the considerations underlying its construction, see "Treesury Bulletin" for April 1943, page 61.
 Monthly everages of daily figures. Prior to April 1, 1938, corpo-

- rate bonds are averages of Saturday figures.

  The composition of the high-grade corporate bond average was revised commencing with November 1, 1944. The old average for November 1944 was 2.56%. See footnote 2.
- 5/ On days when the exchanges are closed, the date and prices of the

previous day are used.
Indicates change in composition of average.
Exchanges were closed.

Back Figures: For monthly data for the period January 1941 through June 1942, see "Treasury Bulletin" for September 1943, page 73.

Source: Daily Treesury Statements.

1 These items represent the difference between the cost value and the mometory value of eilver bullion revalued and held to secure

silver cortificates.
The figures in this column are not cumulative; as the amount of bullion held changes, the potential seigniorage thereon changes.
